NATIONAL PRESENCE

GLOBAL EMPLOYMENT

RPS Defense is deeply aligned with the military operational culture. Over 95% of our employees have a military and operational background. We are mission-focused, operational-oriented, and take great pride in our ability to meet our customers' needs through proven processes with speed and agility.

MISSION-ORIENTED WITH A WARFIGHTER AND CUSTOMER FOCUS

DEFENSE SERVICES

FLIGHT OPS

With over 70 aircrew and combined experience of over 300,000+ Government-Owned Contractor-Operated (GOCO) flight hours across an array of aircraft, RPS Defense is uniquely equipped to lead, manage, and execute flight operations and UAS services around the globe.

RPS Defense provides comprehensive course and courseware development, training, and performance management for any manned or UAS mission. Our effective methods of measurement ensure student performance and instruction quality, resulting in increased efficiency and improved operational safety.

FLIGHT TRAINING

MAINTENANCE

RPS Defense offers a full spectrum of military and commercial maintenance services, ensuring safe, reliable, and efficient flight operations. Our exceptional staff of maintenance pros carry Airframe & Powerplant (A&P) certifications, along with myriad of other advanced licenses and authorizations, to provide our customers only the highest-caliber maintenance services and solutions.

RPS Defense provides world-class flight test operations, leveraging our deep knowledge and experience developing, validating and executing test plans to ensure our customers' newest technologies deliver the capabilities required for tomorrow's missions.

TEST & EVALUATION

MUNITIONS

RPS Defense is a recognized leader in munitions system integration, testing, loading, training and curriculum creation. Whether outfitting manned aircraft or unmanned combat aerial vehicles, our munitions services emphasize repeatable processes and safety, with checks every step of the way to ensure accountability, redundancy, and quality of work.

RPS Defense analysts perform classified and unclassified analysis across a broad spectrum of intelligence domains. Our expert and detailed technical analysis and written all-source assessments on adversary systems, sub systems, and components are provided for use across the entire DoD Intelligence Community.
